**SPORT** | **STYLE** | **SOUND** | **POWER**

## OUR STORY

In August 2013, Johan “Rasta” Forsgren was out biking in the magical beautiful Issjödalen in western Jämtland together with four friends.

The landscape around Issjödalen was formed by a gigantic glacial lake in the closing stages of the last Ice Age, about 8.000 years ago. The Sea bed became a large plateau, the size of several football fields and completely flat. Below lies pyramids that were formed by sand and stone.

Since they all were blown away by the environment in every way, they wanted to take pictures and film with their smart phones.

The problem was that everyone had their smartphones in their backpacks, pockets or in a sport armband that didn’t work. It was complicated to constantly take them out to document the experience.

Once back home, Johan contacted the product designer Jan Fjellström who came up with the solution – the “Quick Access” velcro system. And so, the concept was borne.

The MOC brand now contain a whole range of mobile products for all kinds of sports and outdoor adventures as well as cases, bags and smart accessories for fashion and every-day use.

## WHAT IS MOC?

MOC (Mobile Outdoor Cases) is a concept solution for carrying your mobile phone when you are active in sports or other activities, outdoors as well as indoors. The following details has been our “key points” when developing MOC:

- It should be easy to access the device and you should be able to remove it from its holder with ease.
- The holders should have an excellent fit and feel comfortable when wearing.
- The cases and bags must protect your device.
- The system should be flexible so it can be used in many different ways.
- The cases and bags must fit most mobile phone sizes.
- With the velcro system you should be able to attach various cases and bags to your favorite holder.

The MOC concept is based on **QAS** – a Quick Access System so you can easily remove your device from its holder when wearing it. The material used in many of our holders is in “Medical Stretch Quality”, which means that our holders will sit comfortably on your body and will flex and stretch as the muscles moves.

# PREMIUM SPORT ARMBAND WITH DETACHABLE BAG OR CASE

Absolutely the best armband on the market... Ever!

Easy to remove and replace your phone with "Quick Access System".

Extraordinarily elastic, yet firm, adjustable armband.

Silicone pattern on the backside to make it stick to skin or clothes.

Extra strong velcro makes your device stay securely attached during activity.

Rubber break-lip prevents accidental armband release.

Coated material protects your phone from sweat transfer.

Moisture resistant material.

Touch-ID compatible window.
