qnect
Simple. Smart. Solutions.
Enjoy the comfort
in your home

“qnect” is a young smart home brand dedicated to offering affordable, simple smart home solutions that make your day to day life more comfortable.

Simple

Connect qnect products directly to your Wi-Fi without the use of a separate hub.

Do not hassle with complicated manuals, let the app guide you through the setup process. The only thing you really need is your Wi-Fi password!

No need for an entire start-up kit, hub, gateway or bridge, you can get going with just one product, the free app and from there you can start exploring and expanding your connected home.

Smart

Control all products with the “qnect home” App or use voice control after connecting them to Amazon Alexa or Google Home.

The “qnect home” app gives you full control over the smart products. Create scenes for automated functionalities or check and control each smart product individually.

Combine different qnect products in scenarios and set schedules for advanced smart behaviour. With an internet connection you can control your Smart Home at home or anywhere else.

Solutions

Have you started with a single smart product - Do you want to smarten up your entire home? Feel free to combine different solutions within one powerful app.

It is all possible with the qnect range which is ever expending and therefore will unravel even more possibilities in time.

ANDROID APP ON Google play

Available on the iPhone App Store

Enlighten your life!
with colourful lights !
SMART BULB

SMARTLIGHTING

Take full control of your lights with ‘qnect’ smart lighting that connects directly to your wireless network.

For a less stressful morning, have your “qnect” lights wake you up slowly by gently increasing the brightness.

It is movie night! Create the perfect movie experience by synchronizing your “qnect” light with the sound of the movie. Adjust your lights for your standard evening, or any other situation, with a click on your phone, or just by asking your voice assistant.

Control the brightness and the colour of every ‘qnect’ lighting device individually, in scenes or as a group, from your smartphone or tablet wherever you are.

Not at home ? Simulate your presence by turning on your qnect lights at more or less the usual times. Set quick actions, or combine these lights together with a ‘qnect’ sensor or voice control them by combining them with Amazon Alexa or Google Home.

Smart WiFi bulb | RGB and warm white | E27

QN-WB01

- Connects directly to your home Wi-Fi network
- 9W (≈60W) max. 806 lumen
- RGB + 2700K
- E27
- 25000H
- ≥ 15.000
- Dimmable by app*
- 220°
- ø 60 x 110 mm

Smart WiFi Spotlight | RGB and warm white | GU10

QN-WB02

- Connects directly to your home Wi-Fi network
- 4.5W (≈40W) max. 380 lumen
- RGB + 2700K
- GU10
- 25000H
- ≥ 15.000
- Dimmable by app*
- 100°
- ø 50 x 70 mm

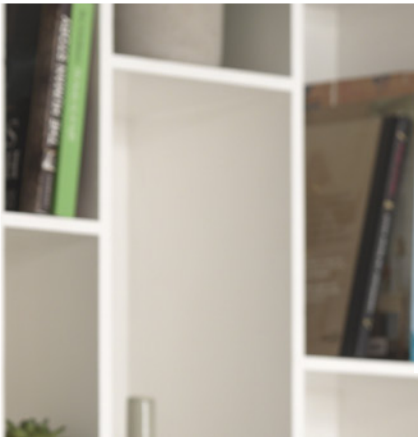
- Max 96W
- RGB | 2700K | 6500K
- IN : 220-240VAC
OUT : 12~24VDC
- 25000H
- Create actions and automations
- Dimmable by app*
- Control by voice
- With remote

SMART**LIGHTING**



Make all your existing appliances smarter, just by installing one of the WiFi smart plugs in between.

Even old appliances can get smarter and more energy efficient. Just install a smart plug in between and you're in business.

Gain more knowledge about usage and setup automatic actions when needed.

The handy power monitor allows you to see at a glance exactly how much power the appliance is using right now, or how much power it has been using over a period of time.

Even more, these smart plugs can be used in every European country because of the Euro plug. Just plug in your existing wall socket no matter if you are living in France, Belgium, Germany or any other country.

Tired of having all these remote controls? Use the "qnect" IR blaster to get rid of all your remote controls. From now on you can control and schedule all those appliances with your "qnect home" app.

SMART**COMFORT**

Make all your existing electronics

smart and energy saving.

Smart WiFi plug | 16A | EU type

QN-WP01 | QN-WP01 DUO

- Connects directly to your home Wi-Fi network

- Set timings and schedules
- Create actions and automations
- Separate control

Smarten up all your old remote controls

SMARTCOMFORT

Smart WiFi IR remote blaster | USB 5V | 360° infrared blaster

QN-WIR01

- Connects directly to your home Wi-Fi network
- USB powered 5V DC ~ 1000mA
- 360° IR blaster
- DIY : takes over your old remote controls
- 7-10m beaming range
- Cloud updated IR codes
- Create actions and automations
- Set schedules
- 38Khz IR frequency
- Control by voice

Control and automate

Anywhere, anytime

#Fullyauomated #Joyofautomation #JustaskGoogle

“qnect” products are compatible with your voice assistants or can be integrated in smart web services.

Take full control of your devices. Use a voice assistant or just ask “Siri”. Create scenes or fully automated functionalities within the app or use a third party integrator. Or just control each smart product individually.

With an internet connection your can control your devices @ home or anywhere with the “qnect home” app.

“Flow” is the superpower behind “qnect home”

With flow you decide what happens, and when it happens. Let your creativity work and discover what flow can do with a limited number of smart devices.

Create multiple flows for one device. Set multiple triggers. Decide when a device acts based on multiple (or just one) conditions.

“qnect flow” is stronger than IFTTT.

Smart mini sensors

with super powers !

Sensors can make things happen, like automatically turning on lights and appliances when you enter a room.

You can also deactivate your sensor at any given time or set up a specific timer.

But sensors can also detect an intruder and set off an alarm or trigger an action within your ‘qnect’ smart home. The lifetime of a sensor will last around 1 year without replacing batteries.

Smart living doesn’t have to be complicated. Envision yourself entering a room where the lights switch on automatically as a response to your movement - or think of useful notifications in case of emergencies like a water leak or smoke.

All these products can be used as a standalone product sending you a notification when triggered, but by combining them with other “qnect” products they can also be programmed to switch any lights, plugs or other device.

Smart WiFi motion sensor | 120°

QN-WMS01

- Connects directly to your home Wi-Fi network
- 2x CR123A
- USB powered 5V 1000mA
- 120° detection angle
- Instant notifications
- Vibration alert
- Create actions and automations
- Event history
- ø 59 x 61 mm

Smart WiFi doorcontact | 2x AAA

QN-WDS01

- Connects directly to your home Wi-Fi network
- 2x AAA
- USB powered 5V 1000mA
- 10mm distance
- Instant notifications
- Tamper protection
- Create actions and automations
- Event history
- 39 x 19 x 75 mm

SMART**SECURITY**

Smart WiFi smoke detector | 2x AA | With heat detection alarm

QN-WSD01

- Connects directly to your home Wi-Fi network
- 2x AA/LR6
  1 year operation time
- Detection zone 20~40m²
- 54 ~70°C heat detection alarm
- Alarm volume: 85dB(A) @ 3m
- 10Y lifetime
- Create actions and automations
- Ø120 x 36mm

Taking care of your home and the people within your home is vital. Always keep an eye out via your smartphone or tablet.

Secure your peace of mind, Wi-Fi smart cameras can function as an extension of your eyes.

All qnect cameras are equipped with excellent night vision and all recordings are stored on a micro SD card or an optional cloud storage plan to offer plenty of footage storage. Above all, qnect camera footage can be streamed to your compatible Chromecast or FireTV device.

Peace of mind

Always and everywhere !

Smart WiFi indoor camera | 720P | Motion detection

QN-IPC01

- Connects directly to your home Wi-Fi network
- HD 720P
- USB powered 5V 1000mA
- 80° detection angle 5m night view
- Instant notifications
- Motion detection
- Create actions and automations
- Micro SD card (Max 64Gb) Cloud storage option
- 70 x 117 x 70 mm

Smart WiFi Motorised camera | 1080P | Motion tracking

QN-IPC02

- Connects directly to your home Wi-Fi network
- Full HD 1080P
- USB powered 5V 1000mA
- 80° detection angle 10m night view
- Pan Angle : 355° Tilt angle : 155°
- Smart motion tracking
- Create actions and automations
- Micro SD card (Max 64Gb) Cloud storage option
- 71 x 131 x 54 mm
